ONLINE AND ON THE MOVE

- 2 | Cell Analysis Support Center, updated mobile apps, virtual training labs, and more

JUST RELEASED

- 4 | Our newest cellular analysis products and technologies

FEATURED RESEARCH TOOLS

- 6 | **Optimize immunodetection with recombinant secondary antibodies**
Superclonal secondary antibodies for sensitive and reproducible immunoassays

PROTEIN FUNCTION AND ANALYSES

- 10 | Cells and soluble mediators of the tumor microenvironment
Antibody-based tools for identifying cell types and proteins of interest
- 12 | Monitor changes in gene expression using luminescence
The HTS-compatible TurboLuc Luciferase One-Step Glow Assay
- 14 | Cast your protein gels with ease
Introducing the SureCast™ Gel Handcast System for protein separation
- 15 | Load more sample with these precast protein gels
Novex WedgeWell Tris-Glycine Precast Protein Gels

CELL VIABILITY AND PROLIFERATION

- 17 | Multiplex assays for robust cell health analyses
CyQuant Direct and PrestoBlue viability assays work together
- 20 | Bring DNA labeling out of the dark
Click-iT EdU and Click-iT TUNEL colorimetric assays for immunohistochemistry
- 24 | Measure accurate cell concentrations by flow cytometry
High-speed cell counting with the Attune NxT Flow Cytometer
- 26 | Protection from photobleaching for live-cell imaging
ProLong Live Antifade Reagent is here
- 27 | Tracking cell division with flow cytometry
A guide to studying cell proliferation by generational tracing

JOURNAL CLUB

- 30 | Appraising the suitability of succinimidyl and lipophilic fluorescent dyes to track proliferation in non-quiescent cells by dye dilution
- 31 | Levels of circulating endothelial cells are low in idiopathic pulmonary fibrosis and are further reduced by anti-fibrotic treatments

IN MEMORIAM

- 32 | A tribute to our colleague Mike Davidson
